

LOFTNESS MULCHER & ROOT CUTTER

Gessner Industries provides a range of Loftness mulcher models to the Australian cotton growing industry for post-harvest crop residue management. The models offered by Gessner cater for 4 row, 6 row and 8 row width configurations. With field proven performance facilitated by designs which minimise jamming and clogging, the Loftness mulchers distributed by Gessner Industries are the most efficient and effective residue management solutions on the market.

ROOT CUTTER UNITS:

- 450mm x 5mm or 500mm x 6mm cutter discs fitted with trash clearing paddles.
- Adjustable spring-loaded mounting arms.
- Heavy-duty mount construction.
- Shear release protection.
- Concealed greasable tapered roller bearings.
- 90 litre per minute hydraulic oil requirement to drive units.
- Units may be mounted to 4 and 6 row mulchers or supplied on a purpose built toolbar.
